SKILLS

Frontend: HTML, CSS, Bootstrap, JavaScript, React.js

Backend: Python, Java, Spring Boot, Jdbc,Jsp

Databases: SQLite

PROJECTS

Employee Management System Application

Developed persistent EMS application with CRUD operations to track list of tasks.

- Create dynamic web pages using JSP, integrating Java code to display and manipulate data.
- Design and implement user interface using HTML for structure and CSS for styling, ensuring a responsive and visually appealing design.
- Implement Java classes and methods to handle CRUD Operations on employee records.

Technologies used: Java, Jsp, Jdbc, Oracle Sql, HTML, CSS.

Student RESTful CRUD Application

- Design and set up the Oracle database schema for managing student records with attributes like name, ID, courses, and marks.
- Create a Spring Boot project, configure dependencies, and establish connectivity with the Oracle database.
- Develop RESTful API endpoints using Spring MVC and Spring Data JPA for CRUD operations on student records.
- Implement repository interfaces and services to handle database interactions and operations.
- Test and validate API functionality using Postman by simulating various scenarios and input data.

Technologies: Java, Spring Boot, Oracle Sql, Postman Tool.

CERTIFICATES

Web Development

I completed a 1-month virtual internship with Code Alpha in web development. During this internship, I built an Online Code Editor website, and a Temperature Converter using HTML, CSS, and JavaScript technologies.
